

How to prepare for you trip!

The course will be broken up into two main sections, separated by the by spring break:

- 1) Physical properties of sound, anatomy, and physiology
- 2) Psychological acoustics

Both sections will demonstrate the relationship between hearing and speech perception. Since the course schedule is online, we will likely stay on schedule, but we will stay flexible just in case.

Class participation during **synchronous** portions of the course is highly encouraged. Synchronous classes will be recorded. Attendance is recommended but not mandatory.

Asynchronous portions of this class include readings and online exercises that should be done before coming to class, and some other online exercises that should be started before class. Lectures slides and Panopto videos will be posted on ELMS.

I recommend you attempt the online exercises by yourself at first, but they can be done with others. Ultimately, it is your responsibility to make sure you consolidate the material.

Ideally, I expect students to be spending two or more hours for every hour spent in class. Since this is a three credit course, most students who do well spend about ten hours per week on the combined synchronous and asynchronous portions of this course.

HESP407 : Bases of Herring Science Student
Spring 2023

3:30–4:45 PM (synchronous class portions)
Mondays and Wednesdays
TWS 0310

Travel to Nova Scotia for the wonderful world of Herring Science!

What did you say? You study herring science?

"After a long, rocky relationship, math and I have reconciled... I was secretly excited that I was going to be able to apply my newfound math skills, rather than panicking like I undoubtedly would have before taking your class."

- **Very smart HESP407 student**

"Your class is the greatest. I can't imagine anyone living without knowing this material."

- **Another (definitely real) very smart HESP407 student**

Trip Details

Herring (*Clupea harengus harengus*) have evolved to process the world around them, allowing them to detect the faintest of noises from a predator, to follow a friend's conversation in a loud and noisy sushi bar, and to appreciate the subtlest of differences between melodies at King Triton's celebration for his daughter's birthday.

At the end of this course, students will:

1. Know the physical, temporal, and spectral properties of acoustic signals (tones, noise, and other complex sounds, including speech signals).
2. Understand basic concepts of signals and systems.
3. Understand basics of sound processing by the auditory system.
4. Be familiar with psychophysical methods used to examine human hearing in the laboratory.
5. Be familiar with the elements of auditory psychophysics, such as auditory sensitivity and discrimination, masking, loudness, pitch, sound localization, auditory scene analysis, and their applications to everyday listening situations.
6. Understand the basic consequences of hearing loss, and the extent to which hearing aids and cochlear implants can help those with hearing impairment.

KASA Standards we cover: A3,11,12,13,14,18,23c,23d.

Our 4-month boat cruise through the wilds of Nova Scotia will allow us to fully examine the importance of the truly amazing herring. Nova Scotia is an unadulterated wildness, untouched by the logarithm industry. The full cost of the trip will be 50 dB (re: \$1).

What You'll Need for the Trip

Optional Text: William A. Yost, "Fundamentals of Hearing: An Introduction" – 5th Edition Academic Press, 2007

ISBN-13: 978-0-12-370473

ISBN-10: 0-12-370473-1

Calculator: A scientific calculator (one that calculates logarithms, sines, cosines, powers, etc.)

Grading: Your course grade will depend upon asynchronous online exercises, synchronous online exercises, and final exam. Grades will be on an absolute scale for the follow percentages:

A+: >97 A: 93-97 A-: 90-92

B+: 90-87 B: 83-86 B-: 80-82

C+: 80-77 C: 73-76 C-: 70-72

D+: 70-67 D: 63-66 D-: 60-62

F: 59 or less

Penalty for late assignments: Synchronous class quizzes=0 points (because I have to grade and post a solution); all other assignments=50% credit maximum

Special Accommodations

Accommodations for registered disabilities at the DSS office, religious observances, and participating in athletic events need to be brought to my attention **on or before February 1, 2023.**

I am writing this to let you know that I am very open to being flexible should life events arise that make it hard for you to keep up with the class. Such events might include things happening to you personally (like serious illnesses) or things happening to family members. Please know that I want to do everything I can to support you. To do this, though, I need to know about a problem when it starts, not after it has already derailed your ability to keep up with class. I do not need to know details. Whatever you are comfortable telling me is fine. Letting me know sooner rather than later, though, is key. I am in a much better position to help you and make accommodations if you tell me when the problem arises. It is MUCH harder to do this if you wait until the end of the term. You can email me.

Upshot: I am here to help. If you are having life issues that are making it hard for you to keep up with class, PLEASE let me know so I can help.

Office/Review Hours are not necessary given that is what the synchronous portion of the course is for.

Individual appointments can be arranged via email.

Date	Class Number	Topic	Panopto Videos	Optional Course Readings in Yost
1/25/2023	1	Class Orientation, Math Overview, Syllabus		Ch. 1 (pp. 1-7), (if necessary) App. A&B
1/30/2023	2	Sinusoids, Simple Harmonic Motion	0.1-0.3, 2.1-2.6	Ch. 2
2/1/2023	3	Sound Transmission and Propagation	3.1-3.3	Ch. 3 (pp. 21-25)
2/6/2023	4	Sound Intensity and Decibels	3.4-3.6	Ch. 3 (pp. 25-27)
2/8/2023	5	Inverse Square Law, Sound Interference	3.7-3.9	Ch. 3 (pp. 27-33)
2/13/2023	6	<i>Catch-Up Day, Finish Chapter 3 Material</i>		
2/15/2023	7	Complex Sounds and Transients	4.1-4.3	Ch. 4 (pp. 37-41)
2/20/2023	8	Complex Sounds: Modulations	4.4-4.5	Ch. 4 (pp. 41-46)
2/22/2023	9	Complex Sounds: Noise	4.6-4.7	Ch. 4 (pp. 47-51)
2/27/2023	10	Sound Analysis and Filters	5.1-5.4	Ch. 5 (pp. 53-57)
3/1/2023	11	Non-Linearities	5.5-5.6	Ch. 5 (pp. 58-61)
3/6/2023	12	Outer & Middle Ear	6.1-6.8	Ch. 6
3/8/2023	13	Inner Ear	7.1-7.7	Ch. 7
3/13/2023	14	Psychophysics	10.1.1-10.1.7	App. D
3/15/2023	15	<i>Catch-Up Day, Chapters 4-7</i>		
3/20-24/2023		Spring Break, No Class		
3/27/2023	16	Thresholds and Temporal Integration	10.2.1-10.2.2	Ch. 10 (pp. 143-150)
3/29/2023	17	Differential Sensitivity	10.2.3-10.3	Ch. 10 (pp. 150-154)
4/3/2023	18	Masking and Critical Bands	11.1-11.4	Ch. 11 (pp. 159-165)
4/5/2023	19	Excitation Patterns and Temporal Masking	11.5-11.10	Ch. 11 (pp. 165-171)
4/10/2023	20	<i>Catch-Up Day, Finish Chapter 11 Material</i>		
4/12/2023	21	Sound Localization	12.1-12.4	Ch. 12 (pp. 173-180)
4/17/2023	22	More Localization and Binaural Unmasking	12.5-12.9	Ch. 12 (pp. 180-186)
4/19/2023	23	Loudness	13.1.1-13.1.7	Ch. 13 (pp. 189-190)
4/24/2023	24	Pitch	13.2.1-13.2.7	Ch. 13 (pp. 191-197)
4/26/2023	25	<i>Catch-Up Day, Finish Chapter 13 Material</i>		
5/1/2023	26	Sound Perception (Grouping)	14.1-14.4	Ch. 14 (pp.203-215)
5/3/2023	27	Sound Perception (Speech&Music)	14.5-14.6	Ch. 14 (pp. 215-220)
5/8/2023	28	Hearing Aids and Cochlear Implants	17.1.1-17.2.7	Acoustics Today Article
5/10/2023	29	Course Review		
5/12/2023		Reading Day
